#### ***Allowable Subject Matter***

3. Claims 1 and 2 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a force-feedback input device for applying a force to an operating unit. The independent claim 1 requires a controller (4) for controlling the driving of the torque generator (3) according to position information output from the position detector (2) so that a force in accordance with the operating state of the operating unit is applied to the operating unit (1), wherein the controller compares an estimated temperature immediately before the power supply is stopped, the estimated temperature stored in the storage unit (6), and the ambient temperature output from the ambient-temperature measuring unit (5), and calculates a new estimated temperature of the torque generator with reference to higher one of the estimated

temperature and the ambient temperature, see figures 1 and 2; whereas, the closest prior art, the Rosenberg et al. patents (U.S. Patents Nos.: 7,038,657 and 6,348,911), which disclose conventional force-feedback input devices having a microprocessor (26) coupled to thermostats (58) for estimating the motors temperature, either alone or in combination, does not teach or suggest the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They are U.S. Patents Nos.: 5,929,607 and 5,739,811 issued to Rosenberg et al. that teaches force-feedback input devices.
